## **Preparation for K9 Inspection**

The handler may end the search if the following steps are not followed or if the dog's safety is at risk.

- The areas to be inspected must not have been sprayed with pesticides for 30 days.
- The areas to be inspected should be clutter free.
- The following items should be removed from floor and furniture:
  - Medications (especially pills not in bottles)
  - Sharp Objects (syringes, broken glass, screws, nails)
  - Food
  - Spring Traps
  - Rodent Traps
  - Pesticide Devices (exposed bait stations for ants, roaches, *etc.*)
  - Toxic Chemicals
  - Pet Food and Water Bowls
- Pets should be confined in cages or carriers or placed in a secured area while the search is being conducted.
- Please refrain from using household cleaners (bleach, ammonia, *etc.*) at least three hours prior to the inspection.
- The area being searched should be free from distracting noises (loud conversations, TVs, radios, *etc.*)

Thank you for contacting Capital K9 Pest Solutions to help resolve your bed bug issue.
